

STORES KEEPER: SCAN TO TOKENIZE

An inventory management solution for British Airways Engineering and beyond.

Current

British Airways 2022 - Present

Duty Maintenance Manager - JFK NY, US

Graduate - Aviation Management Executive MSc at University of London, City

"Stores Keeper originated from my MSc project, which concluded in May 2024. It is now implemented at JFK, with plans for expansion across North America and beyond. By leveraging a QR-code scanning mobile app with blockchain integration, we are equipping our team with the tools they need to streamline operations, enhance accuracy, ensure traceability, and significantly reduce costs."

A high-angle photograph shows two technicians in a workshop. The technician on the left wears a grey hoodie with 'BRITISH AIRWAYS' and a white logo on the back, a dark beanie, and black gloves. The technician on the right wears a dark hoodie and black gloves. They are working on a large, cylindrical metal engine component, likely a CF6 starter unit, which is resting on a yellow surface. Various tools, including a wrench and pliers, are scattered around the component. A cardboard box is visible in the background.

- \$1M AOG

In September 2023 at JFK, a CF6 starter unit was incorrectly cataloged, delays in obtaining it led to a \$1 million Aircraft On Ground (AOG) situation. Situation such as these are recurrent.

Current Challenges in Inventory Management

1. Lack of Traceability and Accountability:

- Inventory data is manually entered.
- No error-checking systems are in place.
- Updating the database is time-consuming.

2. Inefficiencies in Part Retrieval:

- Incorrect records lead to lengthy part-retrieval.
- Aircraft downtime is extended, disrupting operations.
- Part records and documentation are separated, risking integrity.

3. Absence of Monitoring and Predictive Stock Keeping:

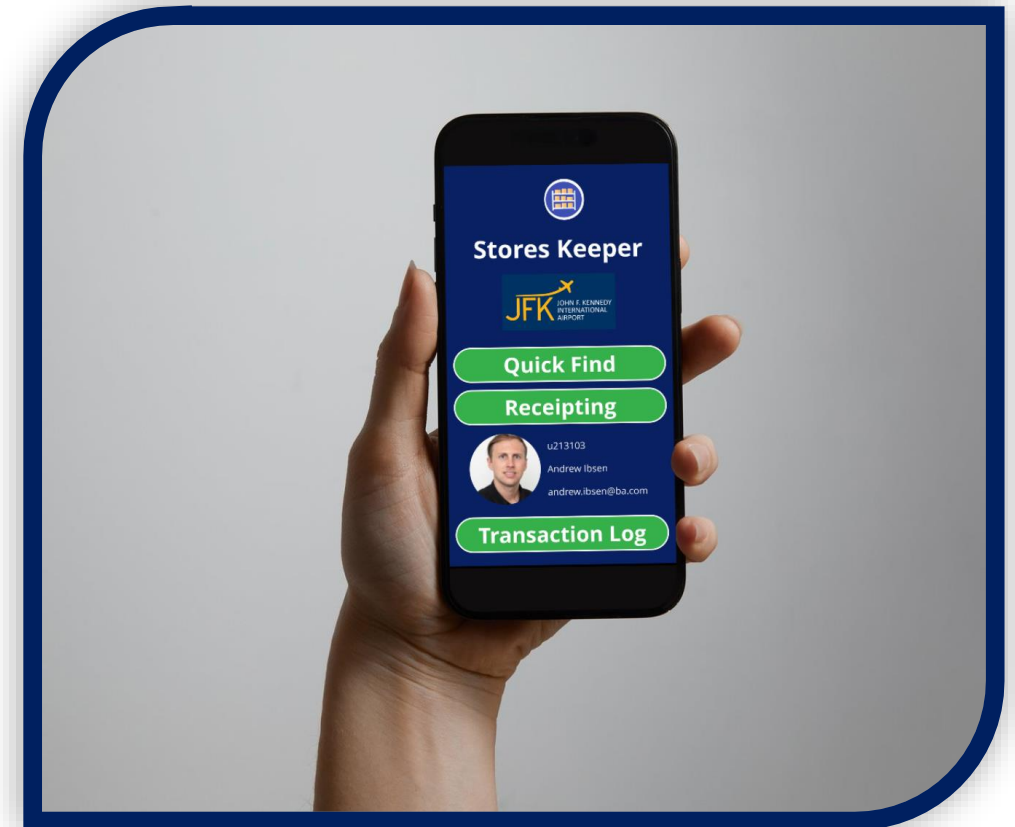

- Inventory records are difficult to access and search.
- Maintenance managers do not rely on data to predict needs.

Illustrative

What is Stores Keeper?

- Accurate, tamper-proof inventory records, backed onto a distributed ledger
- Immutable part documentation records
- User friendly, no-code mobile interface for easy check-in and check-out of parts using barcode scanning, for all maintenance employees
- Accurate automated alert system to prevent low stocks of essentials which could delay operations
- Real-time customizable dashboards to keep track of stocks, costs and efficiency of stores.

Blockchain made Simple

Live Dashboards with Automated Alerts

Make informed decisions using the right data at the right time.

Stores Keeper
Oil Stock Holding - Live Dashboard

Part Number	Description	JFK Location	Batch Number	Quantity Remaining	Modified
387	387 MOBILE JET OIL	H10-B-1-1-0	11118M31A	24	4/24/2024 12:38:20 AM
387	387 MOBILE JET OIL	H10-B-1-1-0	11119B18A	240	4/24/2024 12:38:08 AM
MOBILE JET 2	MOBILE JET 2 OIL	H10-B-1-1-0	11123M04A	480	4/24/2024 12:36:53 AM
2380	2380 EASTMAN TURBO OIL	H10-B-1-1-0	E1257	696	4/24/2024 12:32:34 AM
2197	2197 EASTMAN TURBO OIL	H10-B-1-1-0	E0561	128	4/23/2024 7:08:37 PM

Instructions:

- Please use the Stores Keeper App on your device when replenishing Oil at H10.
Receipting --> British Airways --> "IN"--> Fill Info --> Scan Location and Save.
- Consume the Oil at H10 before transferring it to T8.
Receipting --> British Airways --> "OUT"--> Scan Location --> Select Correct Oil and Units Removed (Note 1 Box is 24 units) --> Save.

Scan the QR Code to Open the Stores Keeper App.

Stores Keeper Impact

After only **3 weeks** of use in JFK, Stores Keeper:

- **Eliminated data entry errors** by all maintenance employees.
- Reduced transaction-time by 30%.
- **Saved 150K** by identifying misplaced and mislabeled parts.

Since its deployment in February 2024:

- 30/30 BA JFK Maintenance Employees use Stores Keeper daily.
- **No misplaced or mislabeled parts** have delayed maintenance.
- 12 managers have customized dashboards and automated alerts.
- BA Quality is currently making it a **local working procedure**.

How big is this global market?

- The global MRO (Maintenance, Repair, and Overhaul) software solutions market is experiencing significant growth. As of 2024, the digital MRO market is estimated to be valued at approximately USD 1 billion and is projected to reach USD 2.0 billion by 2030, growing at a compound annual growth rate (CAGR) of 13.0%
